

Golden Delicious Reinders

Hardly any russetting

The fruit is hardly susceptible to russetting. Suitable for growing in less favourable cultivation areas. The skin is very smooth and the fruit has a very nice shape. The apple's flesh is yellowish, firm, crunchy and sweet, and it has a very low acid content. The harvest must take place at the right time.

Origin

Golden Delicious mutation, found by Reinders (The Netherlands)

Tree

Medium growth, open side branch angle, medium to late bloom, good pollinator

Pollinators: Jonathan, Granny Smith, Gala, Red Delicious, Crimson Gold, Evereste

Harvest

Beginning to middle of September, easy to store

Our Tree - Your Success

The Gruber Genetti Nursery has been the epitome of **supremely high quality** apple tree propagation **since 1991**.
