

Red Delicious Sandidge

Spur type with intense red colouration

The spur type has very intense red colouration. The colour comes early and is uniform across the whole tree. The fruit is medium-sized to large, high with pronounced edges.

Origin

Mutation from Red Chief, found by Charles R. Sandidge in Washington State (USA)

Tree

Growth with typical spur character
Pollinators: Granny Smith, Golden Delicious, Idared, Gala

Harvest

Middle to end of September
