

Gala Schniga SchniCo red

Intense, dark red colouration

Intense, dark red, non-glossy colouration covering the entire surface. The fruit has a medium, conical size. It gains colour very early and is therefore particularly suitable for areas with little colouration.

Origin

Bud mutation from Gala Schniga Schnitzer, found in Nals (South Tyrol).

Licence: Schniga GmbH

Tree

Medium growth, high yield
Pollinators: Fuji, Golden Delicious
Granny Smith, Red Delicious,
Evereste, Golden Gem

Harvest

End of August

Our Tree - Your Success

The Gruber Genetti Nursery has been the epitome of **supremely high quality** apple tree propagation **since 1991**.

Our production site in Roverchiara, Verona/Italy comprises **more than 200 ha**, providing us with a yearly production of **about 2 million apple trees**. Thanks to our many years' experience, our competent staff and state-of-the-art technology, you will receive **high quality saplings** from current varieties and clones.

In addition to comprehensive advice, our service includes **prompt processing** of your order as well as **punctual delivery**.
