

Golden Delicious Klon B Lb

High and regular yield

Characterised by high and regular yield as well as early yield start, good fertility and perfect fruit size. Susceptible to russetting, but beautiful shape and colour with even and typical lenticells.

Origin

Selection from Golden Clone B, Laimburg Test Centre (South Tyrol), 1978

Tree

Medium growth, medium to late bloom, good pollinator

Pollinators: Jonathan, Granny Smith, Gala, Red Delicious, Crimson Gold, Evereste

Harvest

Beginning to middle of September, hardly susceptible to pre-harvest windfall, easy to store

Our Tree - Your Success

The Gruber Genetti Nursery has been the epitome of **supremely high quality** apple tree propagation **since 1991**.

Our production site in Roverchiara, Verona/Italy comprises **more than 200 ha**, providing us with a yearly production of **about 2 million apple trees**.
