

# Wilton's Red Jonaprince Select

## Deep red colour and high yield

This clone is a colour mutation from the Jonagold with early colouration. It delivers a very high and regular yield of large, dark red fruit. Its flesh is very firm, tastes excellent, and the fruit can be stored easily.

### Origin

Mutation, discovered in the nursery of the Princen brothers in Weert (NL)

### Tree

Quite strong growth to begin with, then moderate growth, advantageous horizontal branch layout, medium to late bloom

Pollinators: Braeburn, Gala, Golden Delicious, Idared, Golden Gem, Prof. Sprenger.

### Harvest

Middle to end of September, a single picking run may suffice under certain circumstances.

## Our Tree - Your Success

The Gruber Genetti Nursery has been the epitome of **supremely high quality** apple tree propagation **since 1991**.

Our production site in Roverchiara, Verona/Italy comprises **more than 200 ha**, providing us with a yearly production of **about 2 million apple trees**. Thanks to our many years' experience, our competent staff and state-of-the-art technology, you will receive **high quality saplings** from current varieties and clones.

In addition to comprehensive advice, our service includes **prompt processing** of your order as well as **punctual delivery**.
