

Gala Schniga SchniCo

Full colour, slightly striped

This Gala clone with full colour and slight stripes has dark red colouration across the entire surface. The fruit has a medium, conical size. It gains its colour relatively late, then reaches the ideal state of maturity and time of harvest when the colour has appeared.

Origin

Bud mutation from Gala Schniga Schnitzer, discovered in the KSB mothergarden in Corzano/Brescia.

Licence: Schniga GmbH

Tree

Medium growth, high yield
Pollinators: Braeburn, Fuji, Golden Delicious, Granny Smith, Pinova, Red Delicious, Evereste, Prof. Sprenger

Harvest

End of August

Our Tree - Your Success

The Gruber Genetti Nursery has been the epitome of **supremely high quality** apple tree propagation **since 1988**.

Our production site in Roverchiara, Verona/Italy comprises **more than 200 ha**, providing us with a yearly production of **about 2 million apple trees**. Thanks to our many years' experience, our competent staff and state-of-the-art technology, you will receive **high quality saplings** from current varieties and clones.

In addition to comprehensive advice, our service includes **prompt processing** of your order as well as **punctual delivery**.
