

# Golden Delicious Klon B Lb

## High and regular yield

Characterised by high and regular yield as well as early yield start, good fertility and perfect fruit size. Susceptible to russetting, but beautiful shape and colour with even and typical lenticells.

### Origin

Selection from Golden Clone B, Laimburg Test Centre (South Tyrol), 1978

### Tree

Medium growth, medium to late bloom, good pollinator  
Pollinators: Jonathan, Granny Smith, Gala, Red Delicious, Crimson Gold, Evereste

### Harvest

Beginning to middle of September, hardly susceptible to pre-harvest windfall, easy to store
