

# Golden Parsi da rosa

## Little russetting and high yield

Can compete with Golden Reinders in terms of russetting but retains the properties of Clone B. In higher locations, part of the fruit obtains a red colour which remains red after months of storage. The shape of the apple is high, with characteristic bumps at the top.

### Origin

Golden Clone B, found in Partschins/Parcines (South Tyrol)

**Licence:** KIKU GmbH

### Tree

Medium growth, easy to differentiate from other Golden apples based on its dark wood, medium to late bloom

Pollinators: Jonathan, Granny Smith, Gala, Red Delicious, Crimson Gold, Evereste

### Harvest

Beginning to middle of September (like Golden Delicious Clone B)

## Our Tree - Your Success

The Gruber Genetti Nursery has been the epitome of **supremely high quality** apple tree propagation **since 1988**.

Our production site in Roverchiara, Verona/Italy comprises **more than 200 ha**, providing us with a yearly production of **about 2 million apple trees**. Thanks to our many years' experience, our competent staff and state-of-the-art technology, you will receive **high quality saplings** from current varieties and clones.

In addition to comprehensive advice, our service includes **prompt processing** of your order as well as **punctual delivery**.
