

# King Fuji

## The colour highlight

These new bright red, high coloured blush Fuji clones are available as spur type (King Fuji Spur VW) and as standard type (King Fuji Grofen). The King Fuji VW Spur has a compact growth, therefore receiving better direct sunlight. As a consequence it has a high yield, even with increased tree age. Its early colouration prevents sunburn.

### Origin

Branch mutation from the virus-free Fuji KIKU8 Brak

### Tree

Typically slim spur shape for King Fuji VW

### Harvest

Mid-October

## Our Tree - Your Success

The Gruber Genetti Nursery has been the epitome of **supremely high quality** apple tree propagation **since 1988**.

Our production site in Roverchiara, Verona/Italy comprises **more than 200 ha**, providing us with a yearly production of **about 2 million apple trees**. Thanks to our many years' experience, our competent staff and state-of-the-art technology, you will receive **high quality saplings** from current varieties and clones.

In addition to comprehensive advice, our service includes **prompt processing** of your order as well as **punctual delivery**.
