

Nicoter cov Kanzi

The vivid red club variety

This trademarked vivid red club variety resulted from a cross between Gala and Braeburn. The apple is slightly conical, medium-sized to large, it has juicy, firm flesh with a balanced sugar-acid ratio and a unique flavour.

Origin

Grower: Jo Nicolai Nursery and Leuven University/Belgium

Licence: EFC (European Fruit Cooperation) Belgium

Tree

Medium growth, medium early bloom

Harvest

Middle to end of September

Comment: Owing to the central marketing of the club variety, we can only deliver to customers who are members of a producer organisation that has signed a contract with the variety owner (EFC).
